

Loss to Gulf Tourism from the Oil Spill: **\$22,700,000,000**

And the laws that let it happen remain unchanged.

The gushing oil well in the Gulf has been plugged, but the spill's impact has been devastating—a projected loss of up to \$22.7 billion for tourism alone.* Yet the U.S. Senate has still not acted to plug the legal loopholes that allowed this to happen. It's time to reform our offshore drilling laws to ...

- Strengthen safety standards to protect oil workers and the environment.
- Require greatly improved plans and equipment for oil spill response.
- Hold polluters, not taxpayers, liable for oil spill damages.
- Launch a major restoration and monitoring effort for Gulf Coast communities and ecosystems.

Tell your Senators: The mission is NOT accomplished until they've plugged the leaks in the LAW.
